INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/EP2005/003241

_						
_	Box No. I	Basis of the report				
1.	With regard	d to the language , this report is based on the international application in the language in which it was so otherwise indicated under this item.				
	☐ This re which	eport is based on translations from the original language into the following language , is the language of a translation furnished for the purposes of:				
	☐ pub	ernational search (under Rules 12.3 and 23.1(b)) Dication of the international application (under Rule 12.4) Ernational preliminary examination (under Rules 55.2 and/or 55.3)				
2.	nave been	Ito the elements* of the international application, this report is based on <i>(replacement sheets which furnished to the receiving Office in response to an invitation under Article 14 are referred to in this originally filed" and are not annexed to this report):</i>				
	Description	, Pages				
	1-25	as originally filed				
	Claims, Nun	nbers				
1-24 as originally		as originally filed				
	☐ a seque	ence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing				
3.		The amendments have resulted in the cancellation of:				
	☐ the o	description, pages claims, Nos.				
	☐ the o	drawings, sheets/figs				
	⊔ the s □ any	sequence listing <i>(specify)</i> : table(s) related to sequence listing <i>(specify)</i> :				
4						
+.	nau not bee	port has been established as if (some of) the amendments annexed to this report and listed below n made, since they have been considered to go beyond the disclosure as filed, as indicated in the al Box (Rule 70.2(c)).				
		lescription, pages claims, Nos.				
	☐ the c	Irawings, sheets/figs				
	⊔ the s □ any f	sequence listing <i>(specify)</i> : sable(s) related to sequence listing <i>(specify)</i> :				
	* If ite	m 4 applies, some or all of these sheets may be marked "superseded."				

INTERNATIONAL PRELIMINARY REPORT **ON PATENTABILITY**

International application No PCT/EP2005/003241

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industr Box No. V applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)

Yes: Claims

1,5-8,17-19

No: Claims

2-4,9-16,20-24

Inventive step (IS)

Yes: Claims

No: Claims

1-24

Industrial applicability (IA)

Yes: Claims

1-24

No: Claims

2. Citations and explanations (Rule 70.7):

see separate sheet

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability citations and explanations supporting such statement

Reference is made to the following documents:

- D1: EP-A-0 349 874 (GEN ELECTRIC) 10 January 1990 (1990-01-10)
- D2: US-A-5 407 984 (BRUNELLE DANIEL J ET AL) 18 April 1995 (1995-04-18)
- D3: EP-A-0 381 897 (SORAM VERWALTUNGSGESELLSCHAFT; BOSTIK FRANCE (FR); BOSTIK LTD (GB)) 16 August 1990 (1990-08-16)
- D4: WO 01/53379 A (WINCKLER STEVEN J ; CYCLICS CORP (US); TAKEKOSHI TOHRU (US)) 26 July 2001 (2001-07-26)
- D5: WO 02/22738 A (CYCLICS CORPORATION) 21 March 2002 (2002-03-21)
- D6: EP-A-0 320 656 (GEN ELECTRIC) 21 June 1989 (1989-06-21)
- D7: US-A-4 696 998 (BRUNELLE DANIEL J ET AL) 29 September 1987 (1987-09-29)
- D8: EP-A-0 630 931 (GENERAL ELECTRIC COMPANY) 28 December 1994 (1994-12-28)
- D9: EP-A-0 737 658 (GENERAL ELECTRIC COMPANY) 16 October 1996 (1996-10-16)
- D10: EP-A-0 566 313 (GEN ELECTRIC) 20 October 1993 (1993-10-20)
- D11: US-A-4 760 117 (ANDERSON PATRICIA P ET AL) 26 July 1988 (1988-07-26)
- D12:MENG Y Z ET AL: "Synthesis of cocyclic(arylene disulfide) oligomers and their adhesion properties as heating-melt adhesive" POLYMER, ELSEVIER SCIENCE PUBLISHERS B.V, GB, vol. 42, no. 12, June 2001 (2001-06), pages 5215-5224, XP004230986 ISSN: 0032-3861
- 1. The subject-matter of claims 2 to 4, 9-16 and 20 to 24 appears to be novelty anticipated (Article 33(2) PCT) by the reactive compositions comprising macrocyclic oligomers and at least a linear polymer and their uses as hot-melt adhesives as disclosed in document D1 (see passages cited in the search report, in particular, page 6, lines 22 to 24) and documents D4 to D12 (see passages cited in the search report). It is pointed out that in the manufacture of cyclic polymers there is always a certain amount of linears remaining. Furthermore, when curing a cyclic polymer containing compositions a mixture of cyclic and linears is naturally produced in the intermediate stages of the process. It is further pointed out that the intended use or definition of a (reactive) composition (in the present case as

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application N

PCT/EP2005/00324

hot melt adhesive) does not usually provide novelty to an already described composition (see claims 21 to 24 of the application).

2. The subject-matter of claims 1, 5 to 8 and 17 to 19 appears to be obviously derivable (Article 33(3) PCT) from the teachings of D1 as ethylene is a typical olefin comonomer (see claim 1 thereof) and the application does not contain any indication that its selection may involve an unexpected effect. Furthermore, cyclic polyesters from dicarboxylic acids (see, for instance D2) are obvious alternatives to the cyclic polycarbonates disclosed in D1, which may formally be considered as polyesters derived from carbonic acid. Furthermore, the claimed method of using hot-melt adhesives by first melting them appears to be the standard procedure for applying hot-melt adhesives (see for instance the examples of D3).
